I. INTRODUCTION

I. INTRODUCTION

This bibliography was prepared by San Francisco State University under contract to the California Department of Fish and Game Natural Heritage Division (Interagency Agreement #FG7463NH) and the U.S. Environmental Protection Agency, Region IX, under the Special Grants Program. The purpose of this bibliographic effort was to bring together into a single document the readily available, relevant literature on the flora, fauna, hydrology, soils, geomorphology, and conservation of California's vernal pools and related ecosystems. Yet so much of the important literature on vernal pool ecosystems is published in obscure journals, and so many of the important vernal pool documents are unpublished (e.g., graduate theses) or part of the "grey" literature (e.g., consultant's reports). I have tried to include as many of these more obscure citations as well.

I began this effort with an existing unpublished bibliography prepared in 1995 by L.C. Lee & Associates, Inc., of Seattle, Washington, for the U.S. Army Corps of Engineers, Sacramento District's "A Team" effort to develop a protocol for assessing wetland ecosystem functions in vernal pool ecosystems. It has evolved considerably since its earlier 20-page form, largely with the funding assistance of the California Department of Fish and Game.

A great many references have been added to the original document, and in so doing, I have attempted to be all inclusive. In this regard, I wish to thank all those who allowed us access to their personal files, in particular, Mr. Tim Vendlinski of the U.S. Environmental Protection Agency's Region 9 Office. In addition, Dr. William Shepard of California State University, Sacramento, shared his bibliography on brachiopods and Mr. Barry Hecht of Balance Hydrologics, Inc. shared his bibliography on vernal pools as well. I also wish to thank Ms. Julie Anne Hamon, U.S. Bureau of Land Management and Ms. Sheri Gill, University of California, Davis, for assistance in collecting these references. Finally, I want to thank Mr. Joe Carboni and Ms. Kari Lewis of the California Department of Fish and Game for the opportunity to continue this work in progress. While any errors or omissions are mine, the document is not meant to be final. Updates, revisions, corrections, and an on-line version are planned for the coming years.
